

Feeding Program Report

Introduction

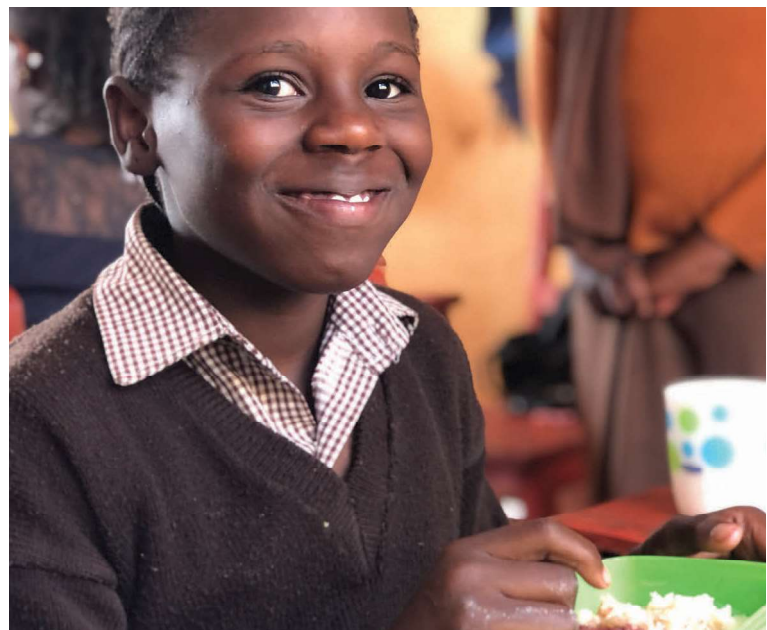

Access to nutritious meals in school is an investment in learning and the future of every child. Through the Moving Mountains School Meals Programme, we are now reaching over 550 learners and serving approximately 900 nutritious meals every school day. The programme continues to provide a vital response to hunger and malnutrition among school-aged children, ensuring that vulnerable learners attend school, remain focused in class and have the opportunity to reach their full potential.

During June, the School Meals Programme continued to expand, responding to the growing number of vulnerable children requiring nutritional support. The increased enrolment demonstrates the important role school meals play in improving attendance, learning outcomes and child wellbeing.

We are currently serving:

- 350 learners with breakfast
- 550 learners with lunch
- Approximately 900 meals prepared and served daily

This continued growth reflects the increasing need within our communities and reinforces the importance of sustained donor support to ensure no child is left behind

FAMILY SUPPORT AND CHILD PROTECTION.

This month, our team visited Titus Wambua, a single father in Dallas Slums caring for his sons, Alfred (8) and Alvin (2), after his wife's passing. Alvin's severe malnutrition and developmental delays require constant care, limiting Mr. Wambua's ability to work, while a lack of birth certificates kept Alfred out of school. Identified by ECDE teacher Pauline, the family received support from our team and with support from Kenneth Maina, an intern at the Rescue Centre, we worked closely with the Registration of Persons Office to successfully obtain birth certificates for both children.

As a result:

- Alfred has now enrolled at Dallas ECDE Centre, grade one.
- He will immediately benefit from the School Meals Programme.
- We paid a visit to the family handed a donation of food supplies to provide immediate relief while longer-term support continues.

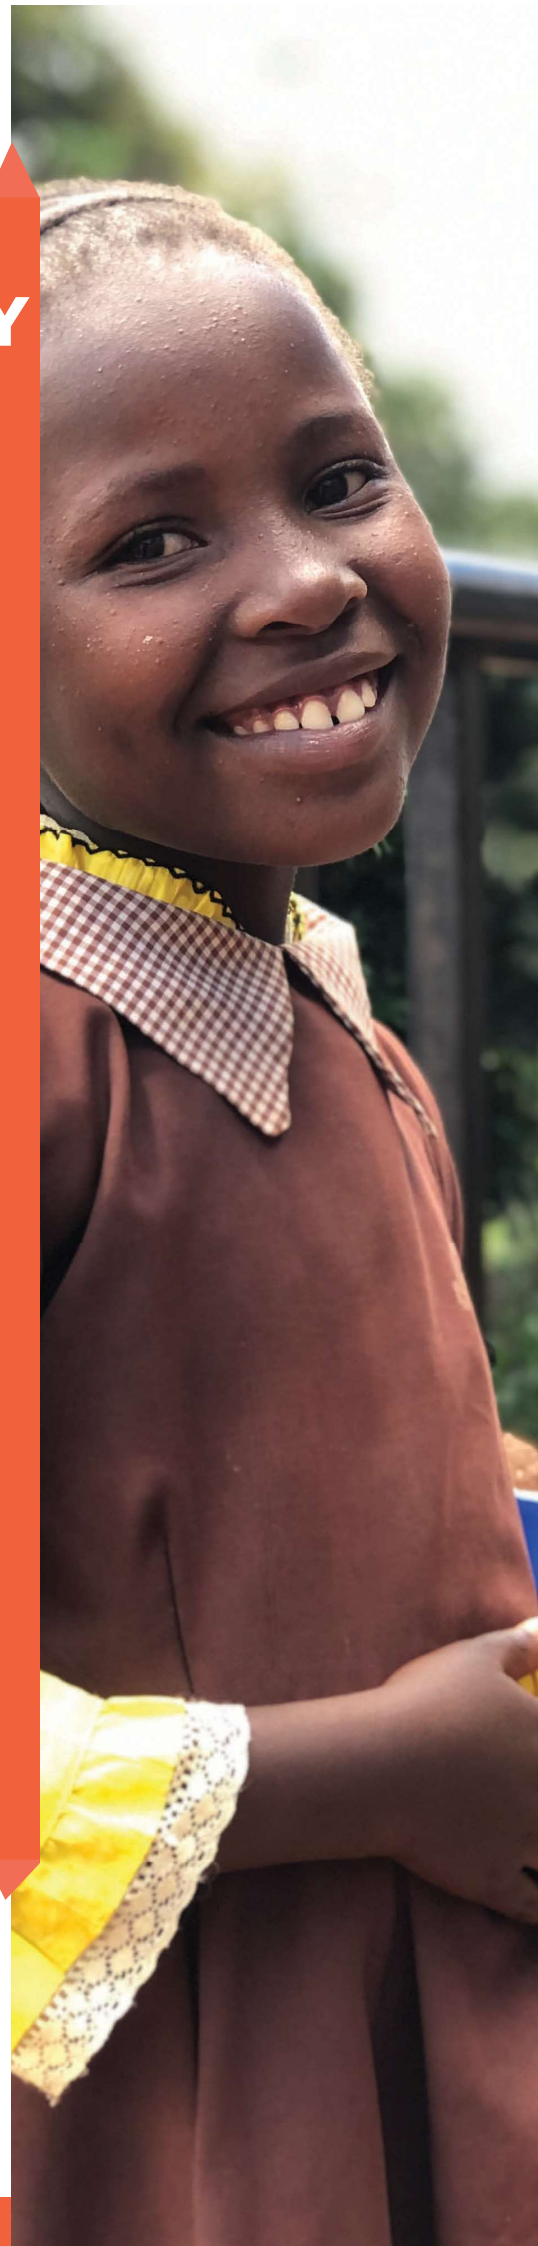

This intervention demonstrates how the School Meals Programme extends beyond nutrition to protect vulnerable children and strengthen families facing crisis.

FOOD SAFETY AND QUALITY ASSURANCE

We welcomed a routine inspection by the Public Health Department from the Ministry of health during the month. Following the inspection:

- They recommended replacement of the metallic bean storage container with a food-grade plastic container which we have purchased to meet the required instructions.
 - Inspectors also confirmed that all kitchen staff possess valid Food Handlers' Certificates, reflecting our continued commitment to maintaining high standards of food hygiene and safety.
-

PROGRAMME EXPANSION.

Demand for school meals continues to grow. We have identified Urban Primary School, with an enrolment of 65 learners in the ECDE Centre, as the next priority for expansion.

ITEM	Total amount
Weekly feeding budget for 65 learners	30,080
Kitchen utensils and equipments	30,500
Total	60,580

Supporting this expansion will allow an additional 65 vulnerable children to benefit from daily nutritious meals, improving their attendance, health, and learning outcomes.

5. Conclusion

June has been a month of growth, impact, and hope. Beyond serving more than 900 meals each day, the programme has continued to transform lives through education access, child protection, nutrition, and family support.

As demand continues to rise, sustainable donor investment remains essential. Every contribution enables another child to attend school without hunger, every meal strengthens learning and every investment helps build healthier, safer and more resilient communities. With continued partnership, we can extend this life-changing support to even more vulnerable children.
